NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 30, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

REMARKS

The figures of births and deaths shown in this statement for the week ending the 24th June, 1950 relate to 123 towns with an estimated population of 18,429 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 53% of the total number of towns representing 65% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 8,505 and 6,429 representing birth and death rates of 24.0 and 18.1 per thousand of population respectively.

(A) States (Parts A and C):—The data here relate to 102 towns with an estimated population of 15,715 thousands. Information about Assam, Bihar, Delhi, Madhya Pradesh and Madras could not be included. The total number of towns is 201 and their population is 24,568 thousands. Thus 51% of the total number of towns representing 64% of the total population is covered. The numbers of births and deaths recorded

in these towns were 6,977 and 5,577 representing birth and death rates of 23.1 and 18.5 per thousand of population respectively. The table at the end gives the position by states.

Hathras in U. P. was the only town which had a high death rate of 52.0 per thousand of population and this high death rate was largely due to deaths from fevers.

(B) States (Part B):—The data here relate to 21 towns with an estimated population of 2,714 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 63 % of the total number of towns representing 72% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,528 and 852 representing birth and death rates of 29.3 and 16.3 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
